50,000	Asparagus and Rhubarb,
Choice New Fruits, House and Bed- ding plants.	

AND

What we have to say about ourselves.

We have been in the nursery business for more than 25 years.

We grow hardy varieties adapted to the North.

Hardy roots—hardy varieties and careful propagation, bring successful results.

Our stock is annually inspected and has never been condemned.

We pack under cover and the stock invariably leaves our grounds in good condition.

We do not claim to be the "largest nursery on earth," but we do claim to be one of the best, and we are big enough to fill any order that we can get and undertake to fill.

Inside, you will find a partial list of the items we grow. It will pay you to read it.
